SUMMARY

- Full-Stack Developer skilled in building robust, scalable, and user-friendly web applications.
- I have hands-on experience in both front-end technologies such as HTML, CSS, JavaScript, React.js, and back-end tools such as Node.js, Java, and SQL.
- I am always eager to learn new technologies and take on challenging projects that push my skills further.
- I enjoy solving real-world problems through intuitive design and reliable back-end systems.
- My goal is to continuously improve and stay up-to-date with the latest technologies in web development.

PROJECTS

Smart Order System

📅 June 2025

A lightweight back-end system to efficiently manage restaurant food orders using Java and MySQL.

- Designed and implemented CRUD functionality to handle customer orders, including item name, quantity, price, and order timestamp.
- Utilized **Java JDBC** for a robust interaction between the application and the MySQL database.
- Ensured data integrity and optimized SQL queries for quick retrieval and updates.
- Created a modular codebase with separate classes for order processing, database operations, and input validation.
- Implemented error handling and input sanitization to prevent SQL injection and runtime issues.
- Gained hands-on experience in **back-end architecture**, **database schema design**, and **transactional data management**.
- TECH USED - SQL, Java

Daily Expense Management System

📅 May 2025

A responsive web-based application designed to help users track and manage daily expenses efficiently through an intuitive interface and real-time data visualization.

- Developed a single-page React application to log transactions with details such as amount, category, date, and description.
- Implemented filtering and sorting options to help users review their expenses by date range or category.
- Designed a clean, responsive UI using HTML, CSS, and custom components in React to ensure cross-device compatibility.
- Strengthened frontend development skills with a focus on state management, component reusability, and performance optimization.
- TECH USED - HTML, CSS, JavaScript, React

INTERSHIPS

- Was a Full-Stack developer student and intern at BESANT TECHNOLOGIES.

AREA OF INTEREST

Front-End Developer
Web Developer Full-Stack Developer
Back-End Developer
Artificial Intelligence

TECHNICAL SKILLS

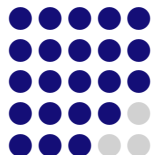

React Competitive Coding SQL
Basics Of Data Structures Figma
Powerpoint Adobe Java JDBC

PERSONAL SKILLS

Problem Solving Techniques
Flexible & Adaptable Leadership
Communication Motivator
Critical Thinking Attention to Detail

LANGUAGES

HTML
CSS
Java Script
Java
Python

SPOKEN LANGUAGES

Tamil
English
Malayalam
